

Atlas Copco, Technical Support Specialist

2025-05-09 23:13:02

Company name

Atlas Copco K.K.

Job description

Technical Support Specialist

Broad Function: The Technical Support Specialist promotes Atlas Copco's growth by providing compressed air services that boost productivity and reduce costs.

Responsibilities

- **Safety:** Prioritize safety in all activities.
- **Management:** Oversee tasks independently or as a team, meeting organizational goals.
- **Technical Support:** Optimize compressed air systems, minimize downtime, and save energy. Provide accurate technical guidance and training.
- **Reporting:** Deliver clear external reports and detailed internal activity records.
- **Kaizen:** Drive continuous improvements in product quality.
- **Learning:** Develop technical and leadership skills while contributing to organizational growth.
- **Collaboration:** Support superiors and work effectively with team members.

Educational Requirements: College-level education in technical or engineering fields or similar.

Experience Requirements: Hands-on experience with air compressors, pumps, and turbo equipment.

Knowledge

- Fluent Japanese for communication; basic English, with readiness to improve.
- Good computer skills.

Personality Requirements: Strong interpersonal skills, proactive, organized, and team-oriented. Willing to travel across Japan
